- Mern Stack Developer
- Course on Python

PROFILE

A Junior MERN Stack Developer is an entry-level professional who designs, develops, and maintains dynamic web applications using MongoDB, Express.js, React, and Node.js. They work on both the front-end and back-end, ensuring seamless integration between user interfaces and server-side logic. Their responsibilities often include writing clean, efficient code, debugging issues, implementing APIs, managing databases, and collaborating with senior developers and designers to deliver responsive, user-friendly solutions.

PROJECTS

PERSONAL PORTFOLIO WEBSITE

- **Description**: A responsive personal portfolio website designed to showcase my skills, projects, and achievements.
- **Tech Stack**: HTML, CSS, Bootstrap, JavaScript
- **Features**:Includes sections for About, Skills, Projects, and Contact, with a modern and user-friendly interface.

TO-DO LIST APPLICATION

- **Description**: Description: A simple and interactive web application that allows users to add, edit, delete, and manage daily tasks efficiently.
- **Tech Stack**: HTML, CSS, Bootstrap, JavaScript
- **Features**:Features: Tasks are saved in the browser's local storage, ensuring data persistence even after the page is refreshed.

RECIPE FINDER APPLICATION

- **Description**: A dynamic web application that allows users to search for recipes by ingredients or keywords and view detailed cooking instructions.
- **Tech Stack**: HTML, CSS, Bootstrap, JavaScript
- **Features**:Utilizes a public recipe API to fetch real-time recipe data, including images, ingredients, and preparation steps.
